# DPH-11 Report on Absolute Vertical Accuracy - continued

The purpose of this section is to show a graphic of lidar data points colored by intensity with NVA check points rendered "thematically" showing the green and red squares sized by Z error.

Data Source - D:\00_ISGS\Final_Client_Tiles1
Result Path - D:\00_ISGS\ISGS_Wabash_Embarras_QC\DPH_11\ColorByIntensity_CheckPoints_NVA.jpg

🟩 Green represents where the lidar surface is above the check point (positive elevation error).

🟥 Red represents where the lidar surface is below the check point (negative elevation error).
The size of the square symbol represents the absolute value magnitude of error.

■ Green represents where a DEM of the lidar surface is above the check point (positive elevation error).

■ Red represents where a DEM of the lidar surface is below the check point (negative elevation error).

The size of the square symbol represents the absolute value magnitude of error.
