		b) Final Coordinate List in Excel Format
		c) NGS Data Sheets for Project Controls

1. INTRODUCTION

1.1 Project Summary

Dewberry Engineers Inc. is under contract to the United States Geological Survey to provide 73 Ground Control Points in the State of Montana. Under the above referenced USGS Task Order, Dewberry is tasked to complete the quality assurance of LiDAR products. As part of this work Dewberry staff will complete Ground Control Point surveys that will be used to evaluate vertical and horizontal accuracy. The ground survey was conducted October 3, 2021 thru November 6, 2021.

Existing NGS Control Points were located and surveyed to check the accuracy of the RTK/GPS survey equipment with the results shown in Section 2.4 of this Report.

As an internal QA/QC procedure and to verify that the Ground Control Points meet the 95% confidence level approximately 50% of the points were re-observed and are shown in Section 5 of this report.

Final horizontal coordinates are referenced to Montana State Plane, NAD83 (2011) in meters. Final Vertical elevations are referenced to NAVD88 in meters using Geoid model 2018B (Geoid18B).

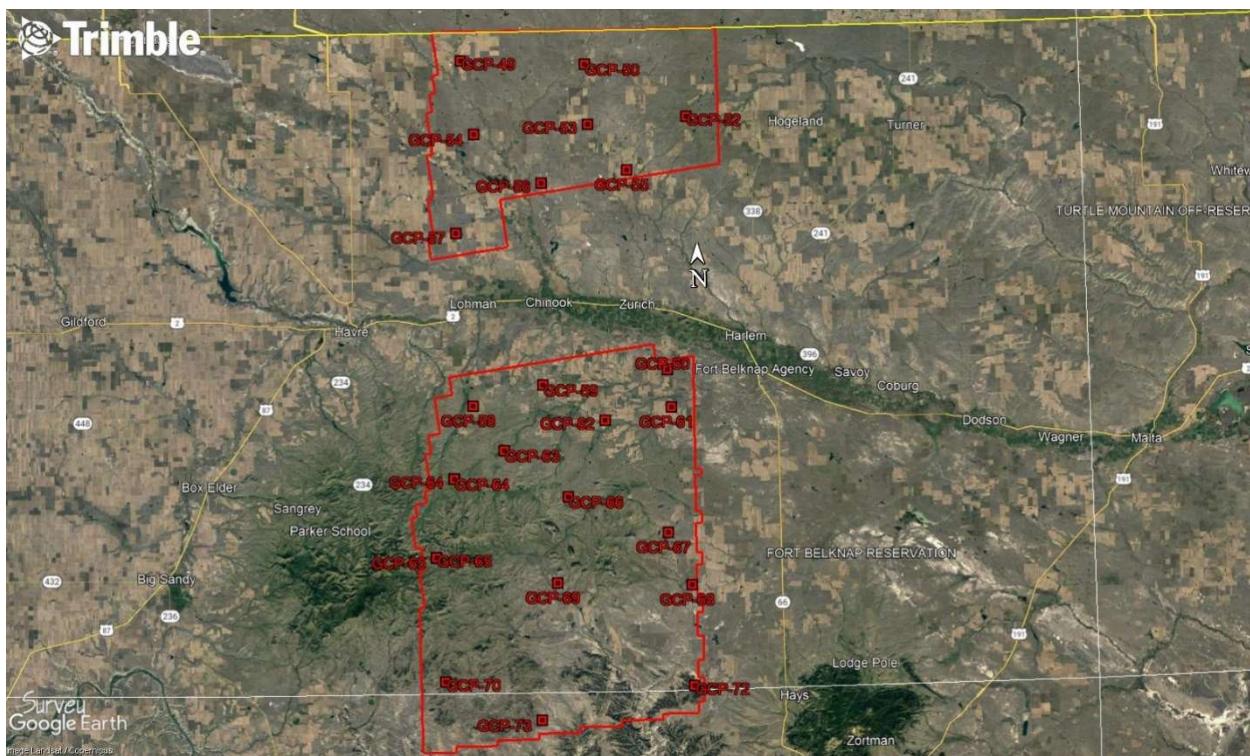

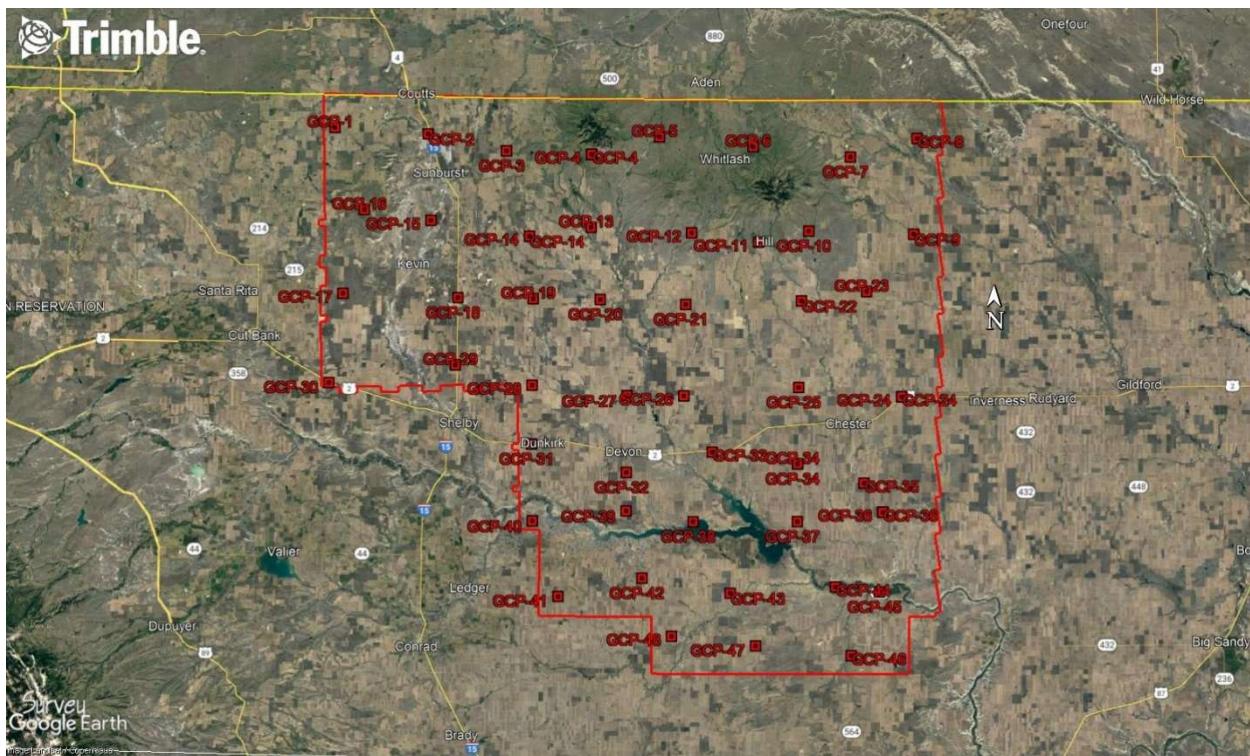

1.2 Points of Contact

Questions regarding the technical aspects of this report should be addressed to:

Dewberry Engineers Inc.

1.3 Project Area

PROJECT DETAILS

2.1 Survey Equipment

In performing the GPS observations Trimble R-10 GNSS receiver/antenna attached to a two-meter fixed height pole with a Trimble TSC7 Data Collector to collect GPS raw data were used to perform the field surveys.

2.2 Survey Point Detail

The 73 Ground Control Points were well distributed throughout the project area.

A sketch was made for each location and a nail was set at the point where possible or at an identifiable point. The Ground Control Point locations are detailed on the “Control Point Documentation Report” sheets attached to this report.

2.3 Network Design

The GPS survey performed by Dewberry Engineers Inc. office located in Lanham, MD was tied to a Real Time Network operated by Trimble RTX. The network is a series of “real-time” continuously operating, high precision GPS reference stations. All of the reference stations have been linked together using Trimble GPSNet software, creating a Virtual Reference Station System (VRS).

The Trimble NetR5 Reference Station is a multi-channel, multi-frequency GNSS (Global Navigation Satellite System) receiver designed for use as a stand-alone reference station or as part of a GNSS infrastructure solution. Trimble R-Track technology in the NetR5 receiver supports the modernized GPS L2C and L5 signals as well as GLONASS L1/L2 signals.

2.4 Field Survey Procedures and Analysis

Dewberry field surveyors used Trimble R-10 GNSS receivers, which is a geodetic quality dual frequency GPS receiver, to collect data at each surveyed location.

All locations were occupied once with approximately 50% of the locations being re-observed. All re-observations matched the initially derived station positions within the allowable tolerance of $\pm 5\text{cm}$ or within the 95% confidence level. Each occupation which utilized the VRS network was occupied for approximately three (3) minutes in duration and measured to 180 epochs.

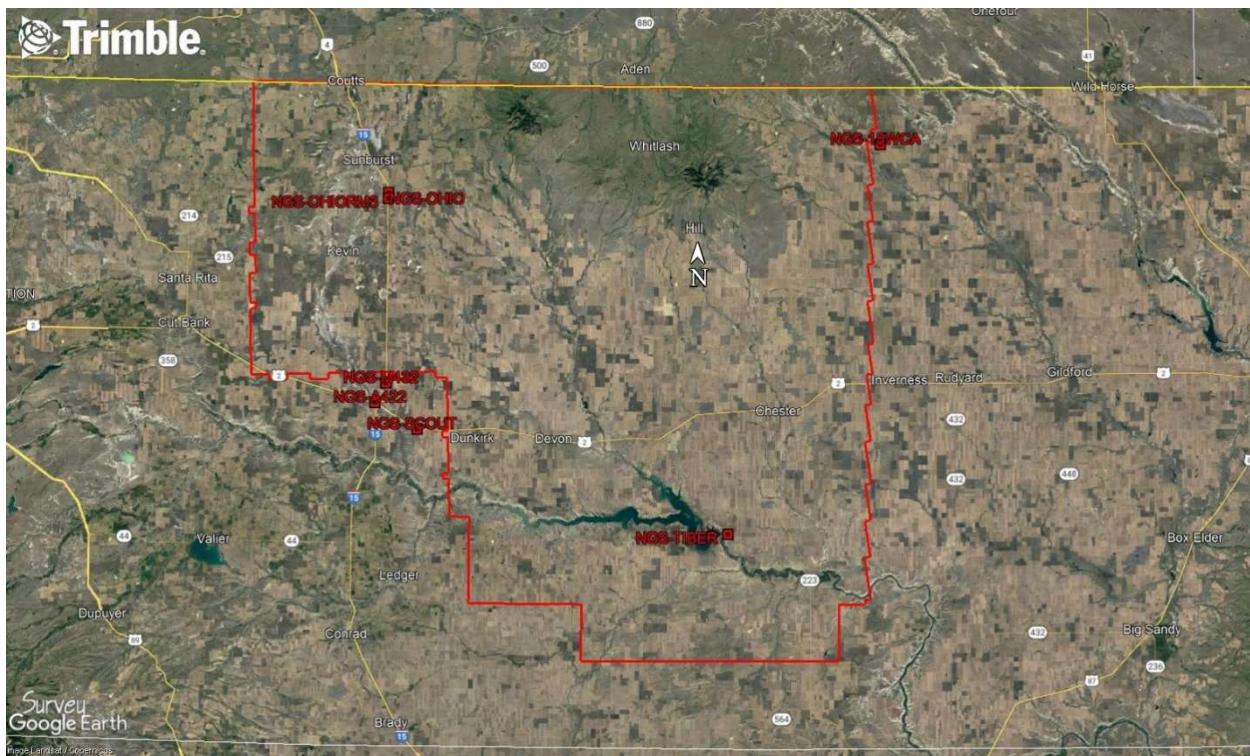

Each occupation which utilized OPUS (if used) was occupied between 20 and 30 minutes. Field GPS observations are detailed on the “Control Point Documentation Reports” submitted as part of this report.

Ten (10) existing NGS monument listed in the NSRS database were located for the Louisiana area as an additional QA/QC method to check the horizontal and vertical accuracy of the VRS network as well as being the primary project control monuments designated as TKo168, TKo183, TKo335, TKo330, TKo356, TKo322, TKo447, TL0297, TL0707, and TL0363. The results are as follows:

PT. #	Observed Values			Data Sheet Values			ΔX	ΔY	ΔZ
	NORTHING	EASTING	ELEVS.	NORTHING	EASTING	ELEVS.			
C280	448560.478	629595.351	1039.313	448560.517	629595.359	1039.271	-0.039	-0.008	0.042
F515	482970.568	613282.223	737.071	N/A	N/A	737.064	N/A	N/A	0.007
K515	479806.238	603176.023	751.349	N/A	N/A	751.331	N/A	N/A	0.018
L512	475196.588	655892.590	717.004	475196.634	655892.602	716.994	-0.046	-0.012	0.010
Q515	479695.820	592926.193	752.370	N/A	N/A	752.337	N/A	N/A	0.033
S280	438859.057	613413.281	1248.913	438859.107	613413.294	1248.922	-0.050	-0.013	0.009
CHERRY	514096.400	639935.058	1088.236	514096.367	639935.025	1088.200	0.033	0.033	0.036
15WCA	519039.057	509699.746	968.012	N/A	N/A	968.004	N/A	N/A	0.008
A422	477080.409	423899.688	1001.399	477080.396	423899.678	1001.356	0.013	0.010	0.043
M432	480316.671	425816.529	1060.535	480316.663	425816.522	1060.514	0.008	0.007	0.021

The above results indicate that the VRS network is providing positional values within the 5cm parameters for this survey.

NGS Monuments

2.5 *Adjustment*

The survey data was collected using Virtual Reference Stations (VRS) methodology within a Virtual Reference System (VRS).

The system is designed to provide a true Network RTK performance, the RTKNet software enables high-accuracy positioning in real time across a geographic region. The RTKNet software package uses real-time data streams from the Trimble RTX network user and generates correction models for high-accuracy RTK GPS corrections throughout the network. Therefore, corrections were applied to the points as they were being collected, thus negating the need for a post process adjustment.

2.6 *Data Processing Procedures*

After field data is collected the information is downloaded from the data collectors into the office software. The Software program used is called Trimble Business Center.

Downloaded data is run through the TBC program to obtain the following reports; points report, point comparison report and a point detail report. The reports are reviewed for point accuracy and precision.

After review of the point data an “ASCII” or “txt” file which is the industry standard is created. Point files are loaded into our CADD program (Carlson Survey 2019) to make a visual check of the point data (Pt. #, Coordinates, Elev. and Description). The data can now be imported into the final product.

3. FINAL COORDINATES/ELEVATIONS

POINT ID	NORTHING (m)	EASTING (m)	ELEV. (m)
MONTANA STATE PLANE, NAD83(2011), NAVD 88, Meters, Geoid 18
