Thanks Brandon.  
I'll pass this on to Merrick-Surdex.

Thanks,  
Pat

Hi Pat,

I received the HDD containing the NE NRCS ortho pilot and have reviewed the data.

- The dataset is complete (all images and shapefiles present)
- Radiometric adjust and final color is good
- Metadata is complete and passes the parser
- There is a slight rounding issue in some of the world files, likely caused by the specified number of decimal places in the file (see below).

Overall, the data looks good.

Let me know if you need anything else.

Brandon McKenzie

I just received the Pilot tiles for this task.

Who do I send these to?

Pat
