

Ground Survey Report

USGS Humboldt, NV Lidar
312021411

October 2021

Executive Summary

The [Sanborn Map Company, Inc.](#) (Sanborn) was tasked to provide ground survey in the support of aerial survey of lidar for the Humboldt, NV Lidar project. A GNSS ground survey network has been designed and implemented into the project process to establish a common basis for geo-referencing the lidar data products. A total of five hundred and fifty-two (552) ground survey points (136 GCP + 245 NVA + 171 VVA) were established, all points will serve for lidar accuracy validation.

The adjusted GNSS survey of points meets a final adjusted RMS 1/3 of the required product accuracy for Lidar (USGS – QL1 and QL2).

The GNSS survey network was designed using Trimble Business Center (TBC) version 5.4. Final coordinates are in NAD83 (2011), UTM Zone 11 North, NAVD88 (Geoid18), Meters.

Introduction

This report contains the technical write-up of the Trimble CenterPoint RTX GNSS Ground Survey performed in support of lidar products.

Sanborn oversaw the survey team(s) for execution of the GNSS ground survey; all fieldwork including reconnaissance of existing control points, establishment of additional control points, and GNSS surveys. All GNSS data processing and reductions were performed in support of the Humboldt, NV Lidar project. **Figure 1** illustrates the initial survey plan within the project Area of Interest (AOI).

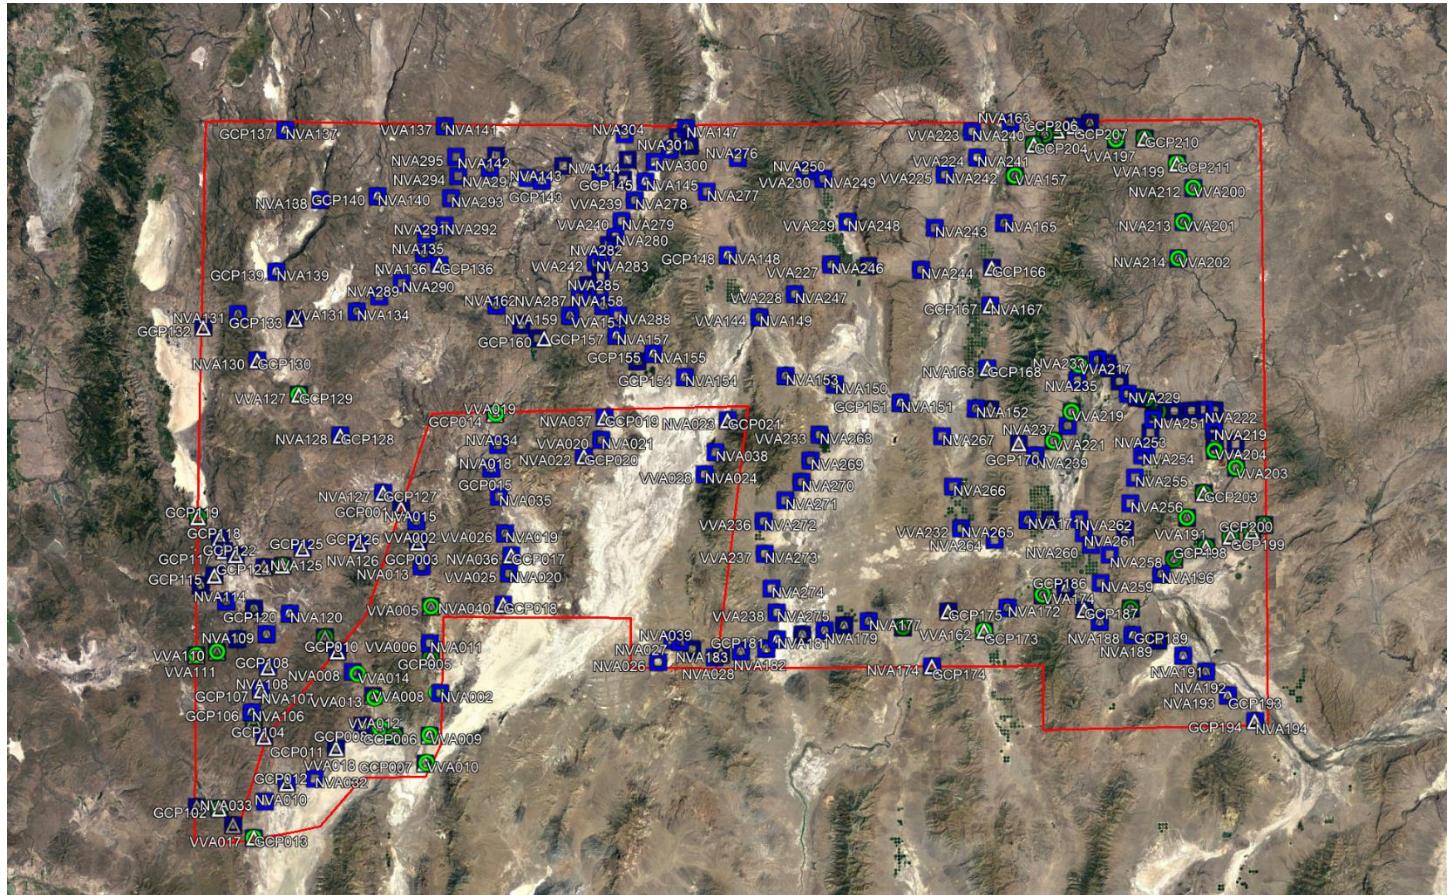

Figure 1: Survey Plan and AOI

Survey Purpose

The GNSS Logs of the observed points can be found in **Attachment A**. **Attachment B** contains the photos of the observed points in the GNSS Network Survey. **Attachment C** contains the overviews of the observed points in the GNSS Network Survey. The ground control points were strategically positioned to satisfy aerial survey requirements for the area of interest (AOI).

Duration/Time Period

The GNSS ground survey was performed from September 13th, 2021 to October 3rd, 2021.

Equipment

The GNSS ground survey was performed using survey grade Trimble R10 GNSS Antennas attached to 2 meter fixed-height rods, leveled over each observed point.

Field Procedures

A careful reconnaissance was undertaken prior to the monumentation and subsequent GNSS survey. The satellite window provided a minimum of 4-hour constellation coverage; GNSS observation sessions were scheduled between 08:00 and 18:00 local time. No difficulties were experienced during this survey.

Personnel navigated to points using local maps, or GNSS navigation. The field crews had approximate geodetic coordinates loaded for the required observation points. Upon arriving at the desired location, the field personnel initiated a search for the point locations. The receiver was set on the 2-meter fixed-height rod and leveled over the point. The GNSS survey was set up as RTX survey style connected via satellite for near real-time positioning. Field crew members followed a session schedule established by office personnel to facilitate observation location and duration.

The GNSS Log Sheet was produced with the following information: Point ID, Stamping (if available), Date, Observer Name, Antenna Height Measurement Point, Antenna Height, Start Time and End Time. Digital photographs were taken at each point showing the control point surveyed and its relationship to its surroundings.

Processing

Trimble CenterPoint RTX was utilized and provided in field correction services. The Survey Network Diagrams (**Appendix A**) and the Coordinates (**Appendix B**) can be found below.

Accuracy

Category	Value (m)	1/3 Value (m)	Value (ft)	1/3 Value (ft)
RMSEz	≤ 0.100	≤ 0.033	≤ 0.328	≤ 0.109
@ 95-Percent Confidence Level	≤ 0.196	≤ 0.065	≤ 0.643	≤ 0.214

Table 1: Lidar Absolute Accuracy Requirements

The final survey networked coordinates yielded station levels of 0.018m horizontally (X, Y) and 0.056m vertically (Z) at 2σ or (95-Percent Confidence Level) meeting and/or exceeding project requirements.

Coordinate Reference System

Horizontal Datum: North American Datum of 1983 (2011)
Projection: Universal Transverse Mercator Zone 11 North
Vertical Datum: North American Vertical Datum of 1988
Geoid Model: Geoid18
Units: Meters
