Project Procedure Summary

Project Description

Quantum Spatial Incorporated was contracted by SEWRPC to field survey LiDAR calibration control points and quality control points in support of the Southeastern Wisconsin 2015 LiDAR and Elevation project. Photo identifiable controls points were also surveyed for the Southeastern Wisconsin 2015 Orthophotography project. There are 100 calibration points throughout the project area for LiDAR and 37 for imagery. There are 100 quality control points located within the non-vegetated (NVA) and vegetated (VVA) land accuracy classes throughout the project area.

Field Procedure

All field work was accomplished from April 22 to May 8, 2015. A RTN GPS survey was performed using a Leica GS15 GNSS receiver connected to the WISCORS network. Each quality control point was set on a flat surface at least five meters away from any significant elevation change. Each point determined by RTN was observed at least twice. The RTN derived coordinates and estimated standard deviations for each measurement were compared and recorded. Data sheet information for each point was gathered including point type, general location, occupation time, equipment used, and photographs. Final coordinates and RMSE values were filled in later in the office.

Office Procedure

Upon completion of the field survey, the observations were input into Leica Geo Office (LGO). Individual measurements for common points were analyzed and averaged. The final coordinate values were then output in the proper projection and format.

Reporting Procedure

The North American Datum of 1983 (NAD83 (2011)), Wisconsin State Plane Coordinate System - South Zone projection was used for reporting the horizontal coordinates in US Foot. The vertical elevations are North American Vertical Datum of 1988 (NAVD 88) utilizing the GEOID12A model and are reported in US Foot.

The Horizontal RMSE at the 95% confidence level is 0.017 ft.
The Elevation RMSE at the 95% confidence level is 0.011 ft.
The 3-Dimensional RMSE at the 95% confidence level is 0.020 ft.

The above statistics are relative to the WISCORS RTN network which is fixed to the NAD83/11 datum. Statistics computed from direct observations of existing published control monumentation can be found on the following pages.

County	Walworth
Description	BEGIN FOGLINE

	Aerial Target
	LiDAR Ground Control
	LiDAR QC Point
	New Control
X	Photo ID
	Published Control

Coordinate System	
NAD83(2011)	
Wisconsin South	
NAVD88	
GEOID12A	
US Foot	

Northing	Easting	Elevation
2297559.027	245754.420	939.865

Operator	WJN
Receiver Model	Leica GS15
Receiver S/N	6328
Antenna Height	1.196

Static Session	WISCORS RTN
Date (MM-DD-YYYY)	5/8/2015
Start Time (UTC)	
End Time (UTC)	4:57:23 PM

Point Ties:

RMSE Hz: 0.001
RMSE Z: 0.003
